Fun Physics

In this course we will develop some fun physics activities with the help of the University of Leicester Physics Department and then take into local primary schools. You will spend the first term carrying out and learning the activities as well as developing skills to run a Physics club in a primary school. In the second term you will go into a local primary school in a group of two or three and with the support of a teacher at the primary school run the session over ten weeks. Besides being great fun, this course will develop your personal skills and confidence and will look fabulous on a UCAS or job application form.

Target Audience

This enrichment is for any Physics student or a non-physics student interesting in a career in teaching, on a UCAS or job application form.

Making a Contribution

Student Ambassador

This course will give you the opportunity to widen your key life skills while helping to promote WQE to prospective students and their parents/carers. You will be able to develop your social and interpersonal skills, improve your communication skills and self-confidence, experience working as a team and individually and learn about event organisation.

You will represent the college at important student recruitment events including Enrolment (Year 2 students), Open Day, Post-16 Events at partner schools, Interview Days (Year 1 students) and College Tours. Your views and feedback will help inform our marketing resources and you’ll have the opportunity to be involved in creating student profiles, vlogs and other promotional materials.

Taking the skills you have you have developed, later in the year you will work as part of a small group to plan and run an event which will benefit future students of the college.

You will develop personal and professional skills which may be beneficial to students who are

Whether you are considering university or the world of work after WQE, this enrichment will help you enhance your application and give you

Target Audience

All students — Year 1 and Year 2’s will have different roles across student recruitment events but will both develop the same skill set.
