

Geography

Subject level A-level

Resource site www.wqe.ac.uk/tasteractivities

Teachers Mrs Mansell
Mr Simpson

Subject context Geography A level covers people's connection to places and the natural world.

Some of the topics you will study are

- **Contemporary urban environments** - this covers modern cities and the issues they face, including climate and drainage issues. Fieldwork visit to Leicester.
- **Coasts**, which covers the processes creating landforms and the management of the coast. Fieldwork to Sheringham in Norfolk.
- **Changing Places**, which covers how a local and far place have changed. Fieldwork in Leicester and Clarendon Park.
- **Water and carbon cycle**, which covers how water and carbon are stored and flow on the Earth and the issues particularly with increased carbon.
- **Hazards** of volcanoes, earthquakes, storms, fires and their impact on people and environments.
- **Global systems and global governance** which includes globalisation and its impacts, world trade, transnational corporations and how the world is governed by global laws.
- **Coursework on a geographical topic of your choice.**

Deadline Complete before your GCSE results day.

Estimated time required to complete activity 3 hours
